Abstract

1. Introduction

Here is an introduction text. For the title of the paragraph please use Heading 1 style. You may use a numbered subsection, which is done as follows.

1.1. Previous Work

For the title of the subsection use Heading 2 style. There is no blank line between paragraphs. Throughout you may cite references of the form [1] or [2]. The numbers are based on the order you place them in the bibliography, not the order they appear in the text. However they should be in alphabetical order. Put square brackets about the number within the text of your paper.

If you use mathematical expression write it in Equation editor and number it in following manner:

$$R(\tau) = \int_{t=0}^{\infty} f(t)f(t-\tau)dt$$
 (1)

You should put a tab before and after an equation as I did for the Equation (1). In equation editor preferences you should use following sizes for *Sizes/Define*: 10, 6, 5, 15 and 10. You may enclose some pictures in your text in the following way:

Please note that the Fig. 1 is centered in the column as well as its caption. **Figure 1** has to be bold, while the rest of the caption must not.

Figure 1. This is a picture

Tables are captioned in the same manner as pictures are. The only difference is that the caption is above the table. Here is an example for that. **Table 1** has to be bold, while the rest of the caption must not.

Table 1. This is my first table

Jan.	Feb.	Mar.	Apr.
5	2	1	6
2	3	4	5
4	5	2	3
4	5	1	3

1.2. This is another subsection

2. Summary and Conclusions

This template will get you through the minimum article and make your job easier. Good Luck!

Acknowledgments

For an unnumbered subsection use unnumbered heading style. Use the same style for references
